Professional Summary

AI/ML & GenAI Engineer experienced in building LLM applications, RAG systems, AI agents, data pipelines, and cloud-native solutions using Python, AWS, and modern AI technologies. Strong backend engineering foundation across Java, TypeScript, REST APIs, microservices, databases, and distributed systems, with experience applying LLMs, prompt engineering, MCP, and agentic workflows to production use cases.

Experience

SDE-I — AI/ML & Data Engineer (May 2026 - Present) at HashedIn by Deloitte USI, Bangalore.

Backend Developer (April 2025 - May 2026) at AntStack Technologies Private Limited, Bangalore.

AI and ML Engineer(Internship) (February 2025 - April 2025) at Sithafal Technologies, Tirupati.

Education

Sree Rama Engineering College, JNTU University

Tirupati, India

B.Tech Computer Science Engineering, CGPA: 8.03

2021 – 2024

Skills & Abilities

Programming Languages: Python, Java, TypeScript, JavaScript, Go and SQL

Generative AI & Agentic AI: LLMs, Generative AI, RAG, AI Agents, Agent Orchestration, MCP, Claude, Claude Code, Claude Skills, Prompt Engineering, Context Engineering, Prompt Harnesses, Tool/Function Calling, LLM Evaluation and AI Guardrails

AI/ML & Data Engineering: Machine Learning, PySpark, Databricks, Pandas, NumPy, Scikit-learn, Data Pipelines, ETL/ELT, Data Processing and Feature Engineering

Backend Engineering: Spring Boot, Django, FastAPI, REST APIs, GraphQL, Microservices, JWT, OAuth and WebSockets

Cloud & AI Platforms: AWS (Amazon Bedrock, Lambda, API Gateway, ECS, EC2, S3, DynamoDB, RDS, SQS, EventBridge, CloudWatch, IAM, CloudFront, SAM, CDK), OCI Data Science, Oracle APEX and Fusion AI Agent Studio

Databases: PostgreSQL, MySQL, SQL Server, DynamoDB and Supabase

DevOps & Tools: Git, GitHub, CI/CD, Docker, Gradle, AWS SAM, CloudFormation and Azure DevOps

Core Concepts: Data Structures & Algorithms, OOP, System Design, Distributed Systems, SDLC and Debugging

Projects

AI/ML-Based Demand & Warehouse Stock Prediction System

- Engineered end-to-end ML pipeline for demand forecasting, processing 500K+ daily transactions with 80% accuracy across 20+ warehouses.
- Optimized feature engineering and model selection, reducing prediction RMSE by 35% and improving inventory allocation accuracy.
- Built scalable data infrastructure using PySpark and Databricks, achieving 60% reduction in data processing time.

AI-Powered Healthcare Management & Data Processing Platform

- Integrated AI-powered clinical workflows including healthcare chatbots and intelligent patient-assessment capabilities to assist healthcare professionals with patient interactions and clinical documentation.
- Built an AI-assisted prescription and clinical documentation workflow that generated draft prescriptions and clinical summaries from manually entered patient assessments, keeping healthcare professionals in the loop for review and approval.
- Developed an intelligent PDF processing pipeline for patient records, automating data extraction with 98% accuracy and reducing manual data entry time by 75%.

Technical Interests

Cloud & System Design: Large-scale distributed systems, serverless architectures, microservices on AWS

AI/ML Engineering: LLM integrations, RAG systems, production ML pipelines

Certifications

Data Analytics with Python (NPTEL) – Applied in ML-driven demand forecasting project with PySpark

Cloud Computing (NPTEL) – Hands-on experience with AWS services (Lambda, EC2, S3, CloudFormation, CDK)
